

# CURRICULUM VITAE

**Name:** Biplav Paudel

**Mobile:** +977-9848942262

**Email:** [biplavpaudel123@gmail.com](mailto:biplavpaudel123@gmail.com)

**DOB:** 2002.04.01

**Nationality:** Nepali

**Current Address :** Balkhu, Kathmandu

**Languages Known:** Nepali, English, Hindi

**Qualification:** Bachelor in Computer Engineering

**LinkedIn:** [biplavpaudel123](#)

**Github:** [biplavpaudel123](#)

## EDUCATIONAL QUALIFICATION:

Education	Institute Name	Year of Passing	Grade/Division
Bachelor in Computer Engineering	Advanced College of Engineering and Management	2080	First Division
School Leaving Certificate (+2)	Valmiki Shikshya Sadan, Bharatpur	2076	A
Secondary Education Examination (SEE)	Orchid School, Bharatpur	2074	A+

## EXPERIENCE

### 1. Bizbazar (Ecommerce Platform)

#### Developer and IT Operation (Internship)

*July 2025 - Present*

- Designing and updating the features focusing the better customer experience on the Bizbazar's website using the HTML, CSS and JS.
- Overview the code base and structure try debugging for Bizbazar's mobile app based on react-native
- Brainstorming and suggesting new templates and offers on the website for improving the sales.

### 2. Academic Work

#### **Advanced College of Engineering and Management**

*Jan 2021 - 2025*

- Proficiency in C programming through academic projects, showcasing ability to solve computational challenges.
- Solid foundation in object-oriented programming principles through coursework in C++
- Strong database management skills by mastering MySQL.

### 3. Projects

#### **Blogging Platform**

**Personal**

*Frontend Developer*

*Aug2025 – Present*

- Developing and Integrating React based frontend for blogging application using Appwrite (BAAS), with maintainable and well written structured code, that will prevent vendor lock-in for future.
- Using hooks, context API and state management using Redux Toolkit.

#### **Nasa Mission Control Api**

**Personal**

*Backend Developer*

*June 2025 – July 2025*

- Made a scalable, testable backend server using NodeJS, MongoDB and Express for a prebuilt frontend made through React and integrated it.

#### **PUBG PC KD**

**Advanced College of**

#### **Prediction System**

**Engineering and Management**

*Team Leader*

*Dec 2023 – March 2024*

- Made an automation in data extraction process outsmarting the limit in API calls and fetched the data from Pubg's official API using Javascript.

### **SKILLS:**

#### • **Javascript : Asynchronous JS and Libraries and Framework based on JS**

React: Familiarity with Hooks, React Router, Context API, State Management with Redux Toolkit, API calls to integrate into backend.

Node and Express: Familiarity with creating scalable and testable REST API and servers, integrating with databases, authentication using OAuth2, writing tests using Jest, SuperTest

#### • **Tools**

Postman & Insomnia for Testing APIs response, MongoDB Atlas, Git, Github

### **INTERESTS:**

**Tech Interests:** Make Scalable and Secure Full stack applications using modern Tech stacks.

### **CAREER ESSENTIALS:**

**Related Coursework:** Data Structures & Algorithms, Objects & Design, Artificial Intelligence, Object-Oriented Programming, Statistics & Applications

**Declaration :** I hereby declare that all the information provided above is true to the best of my knowledge.

**Place:** Balkhu, Kathmandu, Nepal

**Date:** August-2025

**Signature:**
